

PRACTICE DIRECTION

COURT OF KING'S BENCH OF MANITOBA

RE: USE OF ARTIFICIAL INTELLIGENCE IN COURT SUBMISSIONS

With the still novel but rapid development of artificial intelligence, it is apparent that artificial intelligence might be used in court submissions. While it is impossible at this time to completely and accurately predict how artificial intelligence may develop or how to exactly define the responsible use of artificial intelligence in court cases, there are legitimate concerns about the reliability and accuracy of the information generated from the use of artificial intelligence. To address these concerns, when artificial intelligence has been used in the preparation of materials filed with the court, the materials must indicate how artificial intelligence was used.

Coming into effect:

This Practice Direction comes into effect immediately.
